Shutting Down Oracle Database Instances	10
Managing Initialization Parameter Files	10
Using Dynamic Performance Views	10
Advance Startup and Shutdown scenarios.	10
Managing Tablespaces and Datafiles	10
Oracle tablespaces and allocation types	10
Viewing Tablespace Information	10
Creating, Altering and Dropping Tablespaces	10
How to create datafiles with fixed size and auto extend option	10
What are control files and how to view control file content in a trace file	10
Moving and Renaming Online Data Files	10
Temporary tablespaces and temporary tablespace groups	10
Managing Undo	11
Understanding Transactions and Undo Data	11
Storing Undo Information	11
Configuring Undo Retention	11
Comparing Undo Data and Redo Data	11

# **Oracle DBA Training Course**

	Understand Oracle database read consistency	11
C	onfiguring Oracle Net Services (Oracle Networking)	11
	Introduction to Oracle Net Services component.	11
	Configuring the Oracle Net Listener (Dynamic and Static Listeners)	11
	Administering Naming Methods in sqlnet.ora	11
	Dynamic Service Registration	11
	Connecting to an Oracle Database Instance (local and remote).	11
	Oracle netca (Network Configuration Assistant) tool for configuration file generation	11
	Oracle netmgr tool for adding database services to a static listener.ora configuration file	11
	Oracle listener administration and TNS_ADMIN environment variable	11
	Configuring Communication Between Database Instances (database links).	11
V	lanaging Users, Roles and Privileges	11
	Assigning Quotas to Users	12
	Applying the Principal of Least Privilege	12
	Creating and Assigning Profiles	12
	Managing Oracle Database Users, Privileges, and Roles	12
	Standard database auditing	12
U	sed Managed (Manual) Backup and Recovery	12
	Backup and Recovery Concepts (Redo log files and archive log files.)	12
	Backup and Recovery Configuration (Configure the fast recovery area and ARCHIVELOG mode.)	12
	Introduction and planning for a robust Backup and Recovery Strategy	12
	How to create a consistent database backup aka offline backup (COLD BACKUP)	12
	Hot to create an inconsistent database backup aka online backup (HOT BACKUP)	12
	How to clone a database from a consistent database backup.	12
	How to clone a database using Cancel based recovery from an inconsistent database backup	12
	How to clone a database using Time based recovery (Database point in time recovery) from an inconsistent database backup	12
RI	MAN Backup and Recovery	12
	Advantages of RMAN method compared to the user-managed method	13
	Create consistent database backups using RMAN	13
	Create inconsistent database backups (without shutting it down) using RMAN	13

# **Oracle DBA Training Course**

	Oracle database RMAN backup metadata	13
	How to take a full database backup to a custom location	13
	How to backup archive logs only using RMAN.	13
	How to create incremental backups using RMAN.	13
	How to monitor fast recovery area usage in an Oracle database.	13
	How to clone a database using RMAN backup-based duplication.	13
	How to restore and recover a full database from its RMAN backup	13
	How to drop a database using RMAN	13
	Oracle database backup retention policies	13
	How to purge old backups using RMAN.	13
	Use Data Recovery Advisor to perform recovery of the control file and redo log file	13
Oı	racle opatch utility (Oracle Interim Patch Installer)	13
	Learn about Oracle Interim Patch Installer (OPATCH).	13
	What is an Oracle interim patch and how to apply it?	13
	How to apply an Oracle 19c release update (RU) and release update revision (RUR)	13
Oı	racle 12c R1 to Oracle 19c database upgrade	13
	Oracle 19c upgrade paths.	13
	Upgrade an Oracle 12c R1 database to Oracle 19c release using dbua tool	13
M	oving Data	14
	Oracle database logical backup and restore operations (Data Pump Export and Import)	14
	Business use cases of logical backups compared to physical backups	14
	Various Data Pump Export modes	14
	Data Pump Import to import data from an export backup.	14
	Advanced features in Oracle Data Pump Export.	14
М	iscellany	14
	The Oracle database job scheduler API (DBMS_SCHEDULER package)	14
	How to generate a stack trace for ORA- errors (on-error diagnostic dump files)	14
Oı	racle Database Performance Tuning	14
	How to handle performance issues in the real world	14
	V\$ dynamic views for performance monitoring and analysis	14
	How to size the Oracle database memory structures for optimal performance	14

#### **Overview**

Database Administrators (DBAs) are responsible for the design, implementation, support and maintenance of computerized databases in today's organizations. The role also includes architecting, building and scaling databases for future data growth and capacity. They are also responsible for security, performance and availability of data to users and customers.

All the above tasks are performed with the help of a Database Management System (DBMS) and the leading and most widely used DBMS' across the world today are Oracle, Microsoft SQL Server, MySQL and PostgreSQL etc.

#### **Oracle DBA Training Course**

DBAs play an important and responsible role in every company's Information Technology (IT) department. DBAs are also well paid, and the average annual salary is more than \$100,000 in the USA.

### **About DBA University, Inc.**

DBA University, Inc. is a professionally run organization based in Chicago, USA specializing in training and services in computer database administration and development. We are currently offering training in Oracle DBA, Oracle SQL & PL/SQL, SQL Server DBA, Big Data and AWS cloud computing using expert instructors and excellent REMOTE LAB access through affordable prices.

We are very dedicated and committed towards the success of our students. Our courses are **very hands**-**on** and aimed at **job placement** and preparing our students to face the real world with self-confidence
and expert level technical skills in Oracle DBA, Oracle SQL & PL/SQL, SQL Server DBA, Big Data and AWS
cloud computing.

Most of our courses are taught online and hence students all <u>over the world</u> are welcome to register for our courses. Registration for our upcoming courses can be done at <a href="https://www.DBAuniversity.com">https://www.DBAuniversity.com</a>

### **Eligibility**

Anyone can purchase our Oracle DBA course at <a href="https://dbauniversity.com/course/oracle\_dba\_training">https://dbauniversity.com/course/oracle\_dba\_training</a>
But If you are new to Oracle databases, we strongly recommend you to first complete our Oracle SQL Training course for \$499 at <a href="https://dbauniversity.com/course/oracle\_sql\_training/">https://dbauniversity.com/course/oracle\_sql\_training/</a>

### Oracle Certified Professional (OCA, OCP) Certification

Students can use this training to prepare for <u>Oracle Database Administration I Exam Number: 1Z0-082</u> towards becoming an Oracle Database Administration Certified Professional. The same training course can be used for preparing for the Oracle Database 12c Administration 1Z0-062 examination towards Oracle OCA certification (Oracle Certified Associate).

This Oracle DBA Training also contains various topics from the <u>Oracle Database Administration II Exam</u> <u>Number: 1Z0-083</u>

This exam 1Z0-082 also contains various topics on "Oracle Database: Introduction to SQL" and these can be mastered by taking our Oracle SQL Training <a href="https://dbauniversity.com/course/oracle-sql">https://dbauniversity.com/course/oracle-sql</a> training/

#### **Oracle DBA Training Course**

### **Pricing and Registration**

#### **Live Training**

The course fee for live online training is \$699 (all-inclusive price). We also provide remote lab access for practical exercises. Students can connect to the lab server using either a Windows PC or an Apple MAC computer using the Remote Desktop Connection program. So, it is very easy to connect to the lab server.

We teach using a Digital White Board and it gives a traditional classroom like experience. This is a very lengthy and comprehensive database administration course.

- a) Live online training using ZOOM
- b) 8 weeks course in 64 hours.

#### Sundays (4 hours each)

8:00 am central time to 10:00 am central time 30 minutes break
10:30 am central time to 12:30 pm central time

#### Mondays and Tuesday (2 hours each)

7:30 pm central time to 9:30 pm central time

- c) Remote Desktop Connection for lab practical exercises.
- d) Training material PDF book of about 330 pages to each student.
- e) The training fee is \$699 (all-inclusive price)

We use a **DIGITAL WHITE BOARD** for teaching our courses. Teaching with a DIGITAL WHITE BOARD gives our students a traditional **classroom like experience**. The instructor writes and draws by his/her free hand on the DIGITAL WHITE BOARD and all our students can see it in real time in the online classroom. This is a much better training methodology for easier understanding of the course topics.

Please purchase online at https://dbauniversity.com/course/oracle dba training/

We accept online DEBIT CARD, CREDIT CARD or PayPal.

### **Video Recorded Training**

#### **Oracle DBA Training Course**

The video recorded training course fee is \$699 (all-inclusive price). We provide access to our 32 video recordings for 12 months of on demand access on a 24\*7 basis and it also comes with our remote lab access for 6 months (with an option to extend the lab access duration to 1 year). Students can connect to the lab using either a Windows PC or an Apple MAC computer using the Remote Desktop Connection program. So, it is very easy to connect to the lab server.

Even though it is an on-demand course based on video recordings, it still provides you a real classroom like experience because the videos are developed using a White Board. This is a very lengthy and comprehensive database administration course.

- a) 32 video recordings.
- b) Access for 12 months on a 24\*7 basis.
- c) Each video is about 1 hour to 1.5 hours approximately.
- d) Remote Desktop Connection for 6 months. (with an option to extend the access time to 1 year)
- e) Training material PDF book through Dropbox.com email download.
- f) The training fee is \$699 (all-inclusive price)

Please purchase online at <a href="https://dbauniversity.com/course/oracle\_dba\_training/">https://dbauniversity.com/course/oracle\_dba\_training/</a>

We accept online DEBIT CARD, CREDIT CARD or PayPal.

#### Remote LAB access

- We provide a dedicated Remote Desktop Connection to each student to access our lab servers.
- Students can connect from either a Windows or MAC computer with an internet connection.
- We provide LINUX 64-bit server as the operating system for the lab practical exercises.

## **Course Topics**

Introduction to database management systems and databases

### **Oracle DBA Training Course**

What is a database?

Popular database management system (DBMS) software and why Oracle DBMS.

History and Current trends of DBMS and Database Administration.

Oracle database market share and about its current competitive landscape.

Tasks of a Database Administrator.

#### Oracle 12c R1 database software installation

Understand prerequisites for a successful Oracle RDBMS software installation.

Installation of Oracle 12c R1 database software with the latest patchset.

#### Oracle 19c database software installation

Introduction to Oracle 19c release.

Oracle 19c Release Update (RU) and Release Update Revision (RUR) concepts.

Install Oracle 19c database software on Linux 64-bit server.

Installation of Oracle 19c examples software

#### Oracle database creation

Creating an Oracle 12c R1 database using the CREATE DATABASE SQL command.

Creating an Oracle 19c database using the Graphical Tool (Database Configuration Assistant).

## Accessing an Oracle Database with Oracle supplied Tools

Using SQL Plus

Using Oracle enterprise Manager (OEM) Database Express

Using the Database Configuration Assistant (DBCA)

#### **Understanding Oracle Database Architecture**

Understanding Oracle Database Instance Configurations.

Understanding Logical and Physical Database Structures.

Understanding Oracle Database Memory and Process Structures.

Understanding Oracle Database Server Architecture.

#### **Managing Database Instances**

Starting Up Oracle Database Instances

**Using Data Dictionary Views** 

Using the Alert Log and Trace Files

**Shutting Down Oracle Database Instances** 

Managing Initialization Parameter Files

**Using Dynamic Performance Views** 

Advance Startup and Shutdown scenarios.

#### **Managing Tablespaces and Datafiles**

Oracle tablespaces and allocation types.

**Viewing Tablespace Information** 

Creating, Altering and Dropping Tablespaces

How to create datafiles with fixed size and auto extend option.

What are control files and how to view control file content in a trace file.

Moving and Renaming Online Data Files

Temporary tablespaces and temporary tablespace groups.

### **Managing Undo**

**Understanding Transactions and Undo Data** 

**Storing Undo Information** 

**Configuring Undo Retention** 

Comparing Undo Data and Redo Data

Understand Oracle database read consistency

#### **Configuring Oracle Net Services (Oracle Networking)**

Introduction to Oracle Net Services component.

Configuring the Oracle Net Listener (Dynamic and Static Listeners).

Administering Naming Methods in sqlnet.ora.

**Dynamic Service Registration** 

Connecting to an Oracle Database Instance (local and remote).

Oracle netca (Network Configuration Assistant) tool for configuration file generation.

Oracle netmgr tool for adding database services to a static listener.ora configuration file.

Oracle listener administration and TNS\_ADMIN environment variable.

Configuring Communication Between Database Instances (database links).

### **Managing Users, Roles and Privileges**

Assigning Quotas to Users

Applying the Principal of Least Privilege

**Creating and Assigning Profiles** 

Managing Oracle Database Users, Privileges, and Roles

#### Standard database auditing

How to audit DBA login sessions and statements How to enable non-DBA login session auditing. How to disable non-DBA login session auditing How to purge older audit trail records.

### **Used Managed (Manual) Backup and Recovery**

Backup and Recovery Concepts (Redo log files and archive log files.)

Backup and Recovery Configuration (Configure the fast recovery area and ARCHIVELOG mode.)

Introduction and planning for a robust Backup and Recovery Strategy.

How to create a consistent database backup aka offline backup (COLD BACKUP)

Hot to create an inconsistent database backup aka online backup (HOT BACKUP).

How to clone a database from a consistent database backup.

How to clone a database using Cancel based recovery from an inconsistent database backup.

How to clone a database using Time based recovery (Database point in time recovery) from an inconsistent database backup.

#### **RMAN Backup and Recovery**

#### **Oracle DBA Training Course**

Advantages of RMAN method compared to the user-managed method.

Create consistent database backups using RMAN.

Create inconsistent database backups (without shutting it down) using RMAN.

Oracle database RMAN backup metadata.

How to take a full database backup to a custom location.

How to backup archive logs only using RMAN.

How to create incremental backups using RMAN.

How to monitor fast recovery area usage in an Oracle database.

How to clone a database using RMAN backup-based duplication.

How to restore and recover a full database from its RMAN backup.

How to drop a database using RMAN

Oracle database backup retention policies

How to purge old backups using RMAN.

Use Data Recovery Advisor to perform recovery of the control file and redo log file.

## **Oracle opatch utility (Oracle Interim Patch Installer)**

Learn about Oracle Interim Patch Installer (OPATCH).

What is an Oracle interim patch and how to apply it?

How to apply an Oracle 19c release update (RU) and release update revision (RUR).

#### Oracle 12c R1 to Oracle 19c database upgrade

Oracle 19c upgrade paths.

Upgrade an Oracle 12c R1 database to Oracle 19c release using dbua tool

### **Moving Data**

Oracle database logical backup and restore operations (Data Pump Export and Import).

Business use cases of logical backups compared to physical backups.

Various Data Pump Export modes.

Data Pump Import to import data from an export backup.

Advanced features in Oracle Data Pump Export.

#### **Miscellany**

The Oracle database job scheduler API (DBMS\_SCHEDULER package)

How to generate a stack trace for *ORA*- errors (on-error diagnostic dump files)

#### **Oracle Database Performance Tuning**

How to handle performance issues in the real world.

V\$ dynamic views for performance monitoring and analysis.

How to size the Oracle database memory structures for optimal performance.

Oracle database wait events.

How to trace database sessions using DBMS\_MONITOR and DBMS\_SESSION packages.

How to format SQL trace files using the tkprof utility.

Index Monitoring and internals of index maintenance by Oracle.

Statistics data collection for Oracle database optimizer.

What is Oracle automatic workload repository (AWR) and how to obtain AWR reports.

#### Real world life of an Oracle DBA

#### **Oracle DBA Training Course**

Type of Oracle errors. Valid errors and internal exceptions (ORA-00600 and ORA-07445 errors).

How to work with Oracle Support <a href="https://support.oracle.com">https://support.oracle.com</a> to create Service Requests.

Parlance and terminology used by Oracle DBAs.

Working with Oracle Forums for issues.

Productivity tools required when you join the workplace.

Scheduling JOBS and scripts through UNIX/LINUX crontab utility.

#### **Oracle ASM (Automatic Storage Management)**

For Oracle RAC, ASM and Data Guard we have a separate course. Please purchase it at <a href="https://dbauniversity.com/course/oracle-rac-asm-dg-training/">https://dbauniversity.com/course/oracle-rac-asm-dg-training/</a> for \$699.

#### Oracle Database High Availability (RAC, Data Guard)

For Oracle RAC, ASM and Data Guard we have a separate course. Please purchase it at <a href="https://dbauniversity.com/course/oracle-rac-asm-dg-training/">https://dbauniversity.com/course/oracle-rac-asm-dg-training/</a> for \$699.

## **Unique Teaching Methodology**

We use a **DIGITAL WHITE BOARD** for teaching our online courses. Teaching with a DIGITAL WHITE BOARD gives our students a traditional classroom experience. The instructor writes and draws by free hand on the DIGITAL WHITE BOARD and this method of teaching is also adopted in Khan Academy (a world-famous mathematics training organization).

#### **More Information**

- 1. Register for Oracle DBA training at <a href="https://dbauniversity.com/course/oracle\_dba\_training/">https://dbauniversity.com/course/oracle\_dba\_training/</a>
- 2. For additional information, please email <a href="mailto:srini@dbauniversity.com">srini@dbauniversity.com</a>
